

Renova

13A3

Booster to handle water impurities and enhance sunscreen oil removal

Description

Clax Renova is a sequestrant based liquid detergent booster, specially formulated for use in commercial and on premise laundries. The product should be applied in laundries where the water quality and/or steam quality is below standard. In addition, the product can be incorporated in the wash process to enhance removal of sunscreen oil stains. Clax Renova is suitable for all types of fabric.

Key properties

Clax Renova is a highly concentrated liquid detergent booster which can be used to improve laundry water conditions, as it effectively deals with water hardness and commonly found metal ions that would otherwise disturb the laundry wash performance. Clax Renova can also be used in a special program to prevent difficult to remove stains from sunscreen oils – or in case these stains are already set on towels – to reclaim the towels by applying the product in a special reclaim program.

Benefits

- Prevents fabric greying
- Extends linen life by preventing fabric yellowing, loss of whiteness and chemical damage by chelating metal ions in wash solution
- Reduces rewash when properly applied in dedicated wash programs to prevent stains from sunscreen oil
- Can be used to reclaim linen with set stains from sunscreen oils that otherwise would have to be discarded
- Enhances detergency (read fatty stain removal) during the wash process
- Suitable for automatic and manual dosing

Use instructions

To improve laundry water conditions, apply at a dosage of 1-2ml/kg

To prevent stains from sunscreen oil, apply in special program with neutral prewash at a dosage of 5-8ml/kg

To reclaim linen with set stains from sunscreen oil, apply in special program for sunscreen oil stain recovery.

Consult an application specialist from Diversey for further details on the recommended wash processes

Always dose product before adding caustic to prevent water hardness deposition.

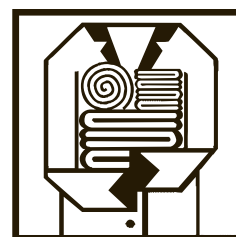

Thoroughly rinse at end of program

Technical data

Appearance: Clear, pale yellow liquid

pH (1% solution): 11,5

Relative density [20°C]: 1,27

**This dosage is according to optimal conditions, recommendations may vary, please consult with your Diversey representative for directions.*

Renova

Other products part of the Clax Magic Reclaim Program: A complete reclaim program may require other products depending on the type of stains encountered.

- (1) To reclaim linen with tea, wine or fruit stains, use Clax Oxy or Clax Peroxy
- (2) To reclaim linen with particulate soil or fatty stains, use Clax Saturn or Clax Pasta
- (3) To reclaim linen with rust stains, use Clax Rust Reclaim
- (4) To recover white cotton linen in case of dye transfer, use Clax Sinox

The above data is typical of normal production and should not be taken as a specification.
