

Detergent disinfectant

Description

Suma Chlorsan D10.4 is a concentrated detergent disinfectant for cleaning and disinfection of all surfaces in food premises.

Key properties

Suma Chlorsan D10.4 is a liquid detergent disinfectant which cleans and disinfects all surfaces in one step. The combination of chlorine, polymer and buffer system makes this product very effective against a wide range of micro-organisms, in all water conditions. The formulation also contains alkalinity source and surfactant, which makes the product suitable for one step cleaning and disinfection.

Benefits

- One product to clean and disinfect.
- Cuts through grease and effectively removes stains.
- Very effective against a wide range of micro-organisms, helps to improve hygiene security.
- Effective in all water conditions.

Use Instructions

The Diversey QFM system can be used to prepare solutions in a controlled way.

General cleaning and disinfection:

1. Use at a concentration of 8ml per litre of water. For viricidal claims increase the dosage to 10ml per litre of water in a bucket (concentration of 1%)
2. Remove gross soiling.
3. Apply with a cloth, brush, mop or low pressure equipment.
4. Leave for 5 minutes
5. Rinse food contact surfaces thoroughly with clean water and allow to air dry.

For heavily soiled areas higher dosages may be required.

D10.4

Technical data

Appearance: Clear, Pale Yellow Liquid
Odour: Chlorine
pH value (neat): > 12
Relative density (g/cm³; 20°C): ≈ 1.11

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet; sds.diversey.com. Store in original closed containers away from extremes of temperature. Only for professional users / specialists.
