

ergodisc[□] 2000

Ultra-high-speed burnisher with excellent dust retention

TASKI ergodisc 2000 offers:

- Best performance and highest gloss level
- Easy and simple use of machine
- Easy storage and transport

The ergodisc 2000 is especially suited for burnishing.

Best performance and highest gloss level

TASKI ergodisc 2000 stands for proven results and high quality, in line with the rest of the range. Ultra-high speed ensures shiny, slip-resistant floors in a fraction of the usual time. Perfect dust retention as a result of the innovative guided airflow technique leads to improved air quality and better polishing results, since dust/residue build-up in pad affects the gloss.

The low noise level allows use of machine during day time.

Easy and simple usage of machine

The ease of use of TASKI ergodisc 2000 simplifies operation significantly during daily operation and reduces the need of operator training. The automatic weight balance does not require manual adjustment. Better working conditions improve productivity through:

- anatomically-formed grip
- adjustable handle bar height
- low noise and vibration level

Easy storage and transport

Easy storage even in a small closet due to small and compact size and the possibility of storage in upright position. Low weight allows easy transport from site to site □ no ramp or truck needed.

Additional Features

Full pad contact: The floating pad drive gives a constant working pressure and enables the machine to be used on uneven floors.

Robustness: TASKI ergodisc 2000 machines are part of an innovative range of single disc machines. The use of high-tech materials creates robust, shock absorbing machines with an extended lifetime and low service costs.

All TASKI ergodisc machines come with 2 years warranty.
