

Diversey™

TASKI® ProSpeed System

Finishing first!

Key advantages

- The system will increase productivity
- Easy to use
- Specially designed disposable floor pad

Benefits

- Eliminates the need to clean-up and refill
- Ergonomically shaped for less operator fatigue
- Applies polish evenly for perfect results

The TASKI ProSpeed System is an easy to handle system for applying floor finish in areas up to 250 m². The system consists of an applicator tool, a specially designed floor pad and a well known floor finish brand TASKI Jontec Eternum, making it a unique solution for applying finish.

TASKI ProSpeed is an ergonomically designed floor finish applicator eliminating the need to carry around canisters. The specially designed pouches can be clicked on the system in two easy steps. One pouch can cover up to 140 m² and can be easily replaced with another pouch.

TASKI ProSpeed has an ergonomically designed handle which reduces the operator fatigue due to its patented shape. The tool will automatically swivel into the correct working position, reducing the need for training and possible operator mistakes.

The TASKI ProSpeed pad glides smoothly on the floor leaving a perfectly levelled film. Its unique material provides always a uniform and consistent film thickness, independent from the operators influence. The pad is easily attached to the Velcro strips on the frame.

The TASKI ProSpeed system combines consistent application of floor finish using an applicator with the benefit of disposability. The TASKI ProSpeed applicator tool has a holder for a 2.5 litre pouch of finish with a spigot attached to a feed tube. The feed tube is secured above the pad holder and feeds the floor finish in front of the pad holder and pad. Both the pad and empty pouch are disposable once the job is done.

TASKI®

The Diversey logo features the brand name in a white serif font, accompanied by a stylized leaf icon to its right. The entire logo is set against a dark blue oval background.
