

TASKI® Micro Trolley Wet

The professional wet cleaning solution

The TASKI Micro cart with double bucket and the new workstation for quick and targeted cleaning interventions in medium-small and cluttered environments, such as bathrooms, common areas, food preparation areas, etc. The operator can have everything they need at hand. It can be set up, thanks to different accessory supports, also to contain cloths, tools, and various products.

Double Bucket Method

- It's the traditional cleaning method in low-risk environments where washing is required. The trolley is therefore equipped with 1 BLUE bucket (detergent solution), 1 RED bucket (rinse solution), and a wringer. The double bucket method, combined with the TASKI system—which utilizes flat microfiber mops or fringe mops, ergonomic tools, and chemical products—ensures excellent and fast cleaning results.

Key advantages

- Modularity
- Flexibility
- Durability
- Peace of mind

Benefits

- Cost-efficiency
- High productivity
- Easy maintenance
- Perfect for every industry

The sustainable solution!

Introducing our sustainable trolley featuring sustainable components: the buckets are made of 98% recycled polypropylene. Each component has a visible date stamp moulded into it for full traceability.

Benefits:

- Environmental sustainability and circularity
- Full traceability of material
- Reduced carbon footprint
- Positive brand image for customers
- High durability, ensuring long service life

TASKI® Micro Trolley Wet

Key advantages

The TASKI trolley system offers complete modularity, flexibility and highest durability for all cleaning methods. The intuitive design allows to move components and accessories to a variety of different positions and to adapt them to specific work habits and processes. Many features make the trolley easier and faster to use, help to increase productivity and flexibility.

Features:

- Modularity: 3 basic platforms and unlimited configuration options
- Ergonomics: easy handle adjustment; easy to maneuver
- Safety: all components can be locked; rear wheels are lockable
- Robustness: high-quality materials; metal supports treated with cataphoresis and powder-coated; anodized aluminum frame
- Hygienic: antimicrobial handles to reduce cross-contamination; autoclavable
- Productivity: support for tilting mop bucket which speeds up and facilitates mop attachment to the tool; accessories
- Sustainability: the buckets are made of 98% recycled polypropylene
- Each component has a visible date stamp moulded into it for full traceability
